

APPENDIX 3: INACTIVE ACTIONS/PROJECTS

CARROLL COUNTY COMPLETED, DEFERRED, AND DELETED MITIGATION PROJECTS		
<i>Project Number</i>	<i>Description</i>	<i>Status</i>
2.2.2	Establish procedures to prioritize or control water use during emergency drought conditions	This project is deferred, pending an update to the Emergency Operations Plan.
5.2.3	Provide floodplain administrator with the authority to go onto private property	This project is completed. The Floodplain Administrator has the authority to monitor property within the floodplain.
5.2.4	Develop specific flood mitigation plans to accompany this mitigation plan for flood-prone areas.	This project is deleted; all mitigation plans should be under the umbrella of this document.
5.4.2	Consider either decreasing the amount of impermeable surfaces or increasing the amount of permeable surfaces upstream of flood-prone areas as such surfaces (impermeable) can increase the amount and rate of runoff that could be absorbed by natural vegetation	This project is deferred. The committee would like to address this type of development with building codes.
6.2.1	Evaluate the feasibility of using structural bracing, window shutters, laminated glass in windowpanes, and hail-resistant roof shingles to minimize damage to structures	This project is deferred until Carroll County implements county-wide zoning and/or building codes.
9.1.3	Encourage the use of Emergency Alert System on commercial radio, television, and cable systems to send out emergency information targeted to specific areas	This project is completed. Carroll County uses a system to send alerts via text and other methods.
10.1.2	Purchase and strategically place tornado sirens throughout Carroll County	This project is completed. Carroll County installed tornado sirens at fire departments throughout the county.
11.1.2	Coordinate with local private contractors to develop mutual aid agreements for emergency snow removal	The committee elected to delete this project. The county uses local and state funds and resources for snow removal throughout the county
14.1.1	Establish a communication system that will allow all jurisdictional fire and police departments to communicate with each other during large-scale emergency situations	This project is completed. First responders use the MARCS radio system for large-scale responses.
14.2.1	Install generators to provide a backup power supply for traffic lights at all major intersections	This project is deferred due to lack of funding available.
14.3.2	Coordinate county GIS systems and 911 systems to facilitate identification of incoming calls and areas to be called when using the reverse 911 system	This project is completed. Carroll County uses NexGen 911 systems, which has reverse 911 capabilities including location of incoming calls.
Leesville 1	Coordinate with ODNR, Dam Safety Engineering Program to conduct periodic safety inspections of the Leesville Lake	This project is deleted. Leesville Village is located upstream of the dam, and would not be affected by a dam failure from the Leesville Lake Dam.
Sherrodsville 1	Coordinate with the local cellular providers to install more cellular towers in the Village of Sherrodsville	This project is completed. The Village of Sherrodsville is now covered by major cellular providers.
Sherrodsville 2	Equip first response units in Sherrodsville with four-wheel drive response vehicles to access individuals in rural areas during severe winter weather	This project is completed. The Village of Sherrodsville has acquired vehicles equipped with 4-wheel drive.
